

Guidelines

for a Successful Construction Project

To all contractors – this is the document you need for your next project.

Guidelines for a Successful Construction Project is a joint publication endorsed by the Associated General Contractors of America, the American Subcontractors Association, and the Associated Specialty Contractors that encompasses best practices for construction projects, from start to finish. From Contractor-Subcontractor relations and bidding processes, to contract administration and project closeout procedures, this document is your guide on how to deliver more efficient, economical, and higher quality construction projects for the benefit of all parties.

Learn:

- Bidding Processes
- Preconstruction Planning
- Successful Project Execution
- And More!

Guidelines for a Successful Construction Project provides suggestions for mutually profitable and ethical general contractor-subcontractor relations

and more! **Download your copy today!**
